

ePLAYSLIP

ePlayslip Quick Reference Sheet

What's an ePlayslip?

An ePlayslip is a digital playslip, only available through the Ohio Lottery ePlayslip app. No more pen and paper – playing has never been easier!

What do I scan? What does a barcode look like?

The barcode looks like a QR code, but will have the game you selected and its cost below it.

Cost
\$2.00

Will the invoice or sales reports change?

Not a bit – it's just like a paper bet card.

As a retailer, how does this benefit me?

You'll see faster transactions, and have less paper to manage.

What games are available?

Powerball with Power Play®, Mega Millions with Megaplier®, Rolling Cash 5, Classic Lotto with Kicker, KENO, Pick 3, Pick 4, Pick 5 and EZPLAY® Games. Plus, when any new games are added, we'll let you know.

What phones can use the app?

The ePlayslip app will be available for both Android (available in the Google Play Store) and iOS smartphones (available in the App Store). App requirements are Android 2.2 and higher, and iOS 7.0 and higher. And tablet users are in luck – while the app doesn't have a custom tablet layout, they can still run the application on their tablet devices.

Step-by-Step Guide to Using the App

1. Launch the ePlayslip application and log in.
2. Log in with your current Lottery account, create an account so you can save your playslips or select the Guest Login option.
3. Find and select the game you'd like to play by swiping a game carousel left or right.

4. It's time to pick your numbers! If the stress is too much, you can always choose Auto Pick at the bottom – and random numbers will be selected.

5. Keep clicking Next or follow the screens to choose the other features for your bet (e.g., number of draws).

6. Add any last-minute changes.

7. Click Show Barcode, and present to your Ohio Lottery Retailer – just like you would a paper bet card.
